**Add additional printers to your POS!** Your business can integrate IP printers to direct print jobs to specific printers. **This is ideal for stores that have food preparation areas.** This requires the purchase of an IP printer from NRS, which is programmed to integrate with the POS. It is possible to target specific print jobs to specific printers.

The purchase of this IP printer requires simultaneous signup for the **Item Modifiers** Premium Feature.

**IMPORTANT NOTE:** Only IP printers provided by NRS will work with the NRS POS. Plug the printer into the same router, switch or the network that the POS is on, and the POS will find it.
