

# NRS PAY

## CASH DISCOUNT

### Introduction to NRS Pay Cash Discount V2: Fully compliant cash discount solution to meet Visa/Mastercard regulations.

#### How it works with the NRS POS:

In Cash Discount v2, the NRS software will calculate dual pricing automatically (credit card price and cash price) at the register. The Cash Discount % will be added to all items being rung up on the register, so the consumer can see both prices during the transaction. When the consumer pays in full with cash or cash equivalence, the discounted cash price will be applied to the basket accordingly.

The screenshot shows the 'Store Configuration' interface with the 'Credit Card' tab selected. The 'Credit Card Integration' section has 'Pax' selected. The 'Batching Out' section shows a 'Batch Time' of 09:00 PM and a 'Batch-out Now' button. The 'FeeBU\$TER Program' section is highlighted with a red box, showing it is 'Enabled' with an 'Item percentage' of 4.00% and 'Manual prices are' set to 'Cash Prices'. An 'Update' button is located at the bottom of the configuration area.

#### Payment Types Defined:

- “CC Price” = Credit and Debit card payments.
- “Cash Prices and Cash Equivalents” = Payments with Cheques, EBT, EWIC, Scratch-Offs, Coupons, and Lottery.

### Merchant-Facing Screen View:

Payment options are transparent for consumers. This allows the consumer to verify the cash price against the label price on products or shelves.

What is your BR Club Number?

### Finalized Receipts View:

When full cash payment is used to close the transaction, consumers will have a receipt showing savings related to the use of cash.
