The NRS PETRO Story

We're a Division of National Retail Solutions (NRS)

National Retail Solutions, Inc. (NRS), a subsidiary of IDT Corporation (NYSE: IDT) offers a point-of-sale (POS) platform for independent c-stores, gas stations, grocery, liquor and tobacco stores nationwide. The NRS platform provides robust hardware with powerful merchant software to help retailers compete more effectively, organize their business, attract customers and increase revenue. NRS' credit card processing service, NRS Pay, offers processing that integrates seamlessly with the NRS point of sale system or that can be used independently.

We Offer an Affordable EMV Compliance Solution for Gas Pumps

NRS Petro offers money and time saving solutions for gas station owners to update their pumps before the EMV compliance deadline. The **NRS EMV EZ Pump Solution** offers gas station operators nationwide an affordable and easy way to retrofit a payment processing solution that accepts EMV payments and complies with EMV standards, without messy renovations and business downtime.

NRS Headquarters: 520 Broad St. Newark, NJ

NRS President & CEO: Elie Y. Katz

Pain Points: NRS Petro resolves these concerns.

Independent Gas Station owners have **3 OPTIONS** when it comes to upgrading to EMV, if they are **NOT** working with NRS Petro:

- A** Replace all gas dispensers on site, which will include:
- Cost of new dispensers and construction - **\$15,000-\$20,000** per pump
 - Possible replacement of existing in store POS solution
 - Bringing equipment and tanks up to the latest code
 - Lost revenue with downtime during implementation of new equipment
 - Inability to phase changes or rollback if implementation is ineffective

- B** Install retrofit devices from other companies:
- Cost of retrofit devices - **\$8,000-\$10,000** per pump (including installation)
 - May not integrate with existing POS and pump equipment
 - Possible replacement needed of existing in-store POS solution
 - Potential need to be upgraded again in 3-5 years.

- C** Ignore the EMV compliance deadline and **stand liable** to fraudulent purchases

What Are the NRS Petro Solutions?

The easiest and most cost-effective solutions for gas stations & petro c-stores:

- Enabled EMV at the pumps
- Credit card acceptance
- An all-in-one point of sale (POS) system

NRS Petro Value Props

- Retrofits to your existing gas pumps with fully UL compliant kits
- Hours v. weeks (or months) of implementation, with the ability to phase in by individual pump
- Reduce PCI Scope by removing sensitive data from in-store system
- Provides an integrated system with the NRS Petro POS that allows gas station owners to simultaneously run indoor sales and outdoor gas transactions on the POS inside
- The EMV EZ pump contains hardware tamper-proofing measures; disassembly of the device will trigger the tamper circuits, at which point it will have to be rearmed by qualified personnel before the device is ready to resume operation.

NRS Point of Sale (POS) System

Our NRS Petro POS is a petro-specific, dual-screen POS, that integrates in-store and outdoors pump sales together, all on one POS. With the NRS Petro POS, gas station owners can edit fuel prices, charge fuel sales, and view gas sales reports on our POS.

Some other features include:

- Merchant Services
- Loyalty Programs
- Customer Coupon programs
- Tobacco Scan Data program
- Age Verification – ID License Scanning
- NRS Marketplace – 24/7 one-touch POS shopping
