

10/2023

Panther Tablet POS • Version 0.8.28

New Features

The following new features have been introduced in this release:

Summary	Details	Ozone Bullets
Register walkthrough	A comprehensive user walkthrough has been added for new users using the Panther POS register, detailing product searching, one-click products, quick options, and basket management. Users can go through the 8 pages that exlians all the basic features inside the register	
Scanning barcodes with Tablet camera	It is now possible to use the Android tablet's camera to scan product UPC/barcodes, in addition to using a barcode scanner.	
Add products to existing Promotions	It is now possible to add products to existing Promotions created in Panther POS.	
Status Tray icons for Devices status and Data Sync status Jira NTPCM-389: Status tray	Icons have been added to the status tray to give details of Devices status and Data Sync status. Image: Synced status added to the status tray to give details of Devices status added to the status and Data Sync status. By themselves, these icons provide a summary of current Data Sync and Devices status, as shown above. However, when these icons are tapped, further details for Data Sync and Devices status are shown.	

Summary	Details	Ozone Bullets
Cash Management Functions	The following cash management features have been added:	
	• Cash in : Add money to the cash register.	
	• Cash out : Remove money from the cash register when logging out.	
	 Cash drop: Remove money from the cash register while still logged in to the register. 	
Altria Promotions integration Jira NSSP-1835: Altria	Altria promotions are now fetched and displayed in Panther POS and usable in the register.	
promotions support	Stores with tobacco scan data program can use panther and receive the Altria promotions inside panther	

Enhancements

A number of bug fixes and minor enhancements have been made in this release, the following table summarizes the significant changes.

Summary	Details	Ozone Bullets
Change Panther POS terminology inline with standard NRS software compatibility	Several text updates have been introduced for better alignment with the NRS ecosystem. Notably, "Employees" has been changed to "Users".	
Jira NSSP-1987: Panther POS Text changes	Various permission-related terminologies have also been standardized across the NRS platform.	
Linking POS Terminal ID to Android device	On installation, Panther checks if other Android devices are linked to the store ID and provides	
Jira NSSP-1996 & NTPCM-509: Linking a POS Terminal ID to a specific Android device	options for device management.	

Summary	Details	Ozone Bullets
Improved licensing management Jira NTPCM-478: Licensing system - improvements	 License checks have been optimized. Panther POS will not verify licenses more frequently than once every 24 hours. Opening the Panther POS app will only trigger a license check if a user is logged in. Otherwise a license check will be made when a user logs in. New prompts and warning texts have been added to inform users about their license status. 	

Features Details:

Register walkthrough

Register Walkthrough: Navigate the Panther register with our user-friendly walkthrough.

Video link - https://drive.google.com/file/d/1TxvanRJ8_Pkj6_P6kyC_9yFzL_b_52uD/view?usp=sharing

Scanning barcodes with Tablet camera

Barcode Scanning with Tablet Camera: Easily scan barcodes right from your tablet's camera within the register.

Simply tap the barcode icon located next to the magnifying glass in the register search bar.

The camera window will open in your register. Please aim the camera at the product's barcode area

When the system detects the barcode, it will automatically process it and provide the result based on your product data. In this case, as we don't have this UPC in our pricebook, it will be handled accordingly.

Video can be found here -
