NRS KIOSK RELEASE NOTES

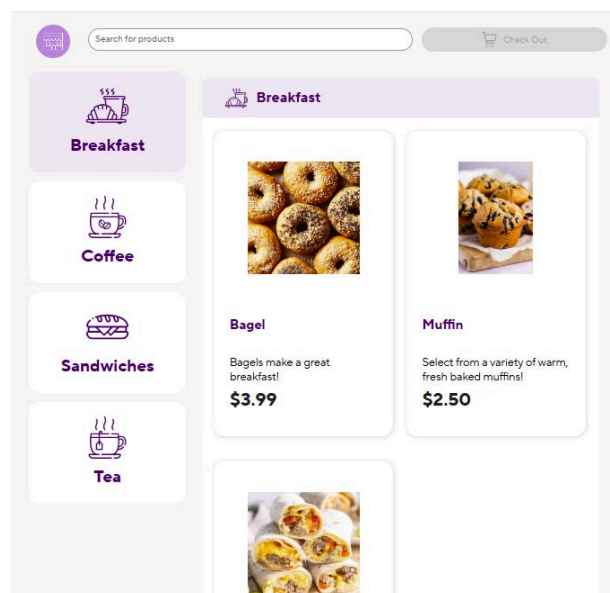

JUNE 2025

I. Improved UI for Menu-Only Mode

We've made further improvements in our menu-only mode

A) Menu Tiles

We've increased the size of the menu tile and removed the quantity picker. Add items to the cart by tapping on them and then tapping add to order. If you need to change an item, open the cart and click on the item.

We've also added an **item description** field. Merchants can add a description to their products in the Pricebook, below the product image.

PLEASE NOTE: Only the first two lines of the description will display on the main menu. The rest will appear when you tap the product.

The screenshot shows the 'Basic Info' tab of an item editor. On the left, there's a product image of bagels, a 'Select Stock Image' button, an 'Upload' button, and a trash icon. Below these is the 'Item Description' field containing the text 'Bagels make a great breakfast!'. On the right, there are various input fields: 'PLU: 01', 'Item Name: Bagel', 'Size:' (empty), 'PLU for eWIC:' (empty), 'Organic:' (checkbox), 'Department: General Food' (dropdown), 'Inventory: Stock: 10' with 'Change' and 'Receive' buttons, 'Promotions: Not included in a promotion' (dropdown), 'Store clubs: Not included in a coffeeclub' (dropdown), and 'Points Level: Not included in a Points Level' (dropdown).

B) Item Popup

- The **item popup**, which appears after tapping a menu tile, has also been updated. We've cleaned up the header and added the full product description.

The screenshot shows an 'Item Popup' for a 'Muffin'. At the top, there's a product image of chocolate chip muffins, the name 'Muffin' in purple, and the price '\$2.50'. Below the image is the text 'Select from a variety of warm, fresh baked muffins!'. Underneath is a section titled 'Muffin Flavors (Required)' with a 'Pick 1' instruction. It lists five options: Blueberry, Bran, Chocolate (selected with a green checkmark), Banana, and Poppy Seed. At the bottom, there's a 'Quantity' selector set to '1' and an 'Add To Cart' button.

C) Checkout Page

- We've made a number of the buttons bigger on the checkout page and improved the tipping section usability.

II. New Keyboard

We have replaced the small keyboard that floated in the middle of the screen with a **full sized keyboard** anchored at the bottom of the kiosk.

The keyboard changes input type depending on whether you are inputting letters (for search, name, notes, etc) or numbers (for phone numbers and tip amounts).
