

# NRS Petro Release Update - July 2025

## Configure FILL Amount

With **Configure Fill Amount**, the neighborhood convenience stores with gas can prevent fraud and cap the fueling limit.

For the truck stop & marina this function will allow your big rigs & boats to fill up with what they need with a higher filling limit.

The FILL quick button amount can now be selected from the preconfigured amounts of 75, 100, 120, 250, 500 and 900 are available.

**PLEASE NOTE: If nothing is selected the default is 120 gallons.**

Big or small, neighborhood or marina, NRS Petro has the fueling solution for you.

The screenshot shows the 'Store Configuration' interface. At the top, there is a 'Back to Tools' link. Below it is a navigation bar with tabs for 'Payment Types', 'Taxes and Fees', 'Credit Card', 'Receipt Footer', 'Portal Account', 'Hardware', 'Printers', and 'Petro'. The main section is titled 'Change Fuel Price' and contains a table with columns for 'Product Name', 'Credit Price', 'Cash Price', and 'Effective Date'. The table lists four fuel types: Unleaded, Plus, Super, and Diesel, each with its respective credit and cash prices and an effective date of 2025-07-21. Below the table is a 'Change Prices' button. At the bottom of the interface, there are three toggle switches: 'Auto Close' (Yes), 'Post Pay Default' (Credit), and 'Fill Amount' (75). The 'Fill Amount' dropdown menu is highlighted with a red box. An 'Update' button is located at the bottom center.

Product Name	Credit Price	Cash Price	Effective Date
Unleaded	1.499	1.249	2025-07-21
Plus	2.217	2.117	2025-07-21
Super	3.219	3.119	2025-07-21
Diesel	4.319	4.219	2025-07-21

Auto Close: Yes  
Post Pay Default: Credit  
Fill Amount: 75
