My NRS Store App New Home Screen and Main Menu Redesign

This release introduces a completely refreshed **Home screen and main menu** for the My NRS Store merchant app.

We've rebuilt the first screen you see after logging in. Instead of a static list of buttons, the new **Dashboard** surfaces live sales data, today's order queue and the tools you reach for most, right up front.

Order Management Added to Merchant App

The **NRS Order Management System (OMS)** gathers all of your website, BOSS Local-app, DoorDash and in-store-kiosk orders into a single, real-time queue, so staff can see what's **New**, **In Progress** or needs **Action** without juggling devices or screens.
