1.0.46 Summary Release Notes

- **Heads-Up Expiration Reminders**

  The POS now displays advance reminders at least 7 days before a paid plan, licence, or free trial expires, allowing store owners to renew or manage features proactively and avoid disruption.

- **Transaction Refunds Support When for Cash Discount**

  Staff can now process refunds for transactions that included a cash discount, refunding the exact amount paid without requiring manager override.

- **Saving Basket Extended Details**

  Held (saved) baskets now retain all details, including dining options, basket notes, per-item notes, and cooking/allergy instructions. These are restored when the basket is loaded and are printed on kitchen tickets.

- **Standard Cash Discount Defaults**

  When Cash Discounting is enabled for the first time, Panther POS automatically applies recommended default settings for cash discount and service fees, simplifying setup.

- **Updated Login Screen**

  The login interface has been refreshed for a cleaner look, improved accessibility (including larger input boxes and clearer labels), and greater consistency with the latest Panther UI.

- **No-Points Departments Badge**

  Departments excluded from loyalty points now display a clear "No Points" badge on the department tile, sales screen, and product-info drawer for fast identification.

- **Unified Tipping Screen**

  Cashiers now see a single tipping screen with common percentage tip options, a custom dollar entry, and a No Tip button, streamlining the checkout process.
