New Features

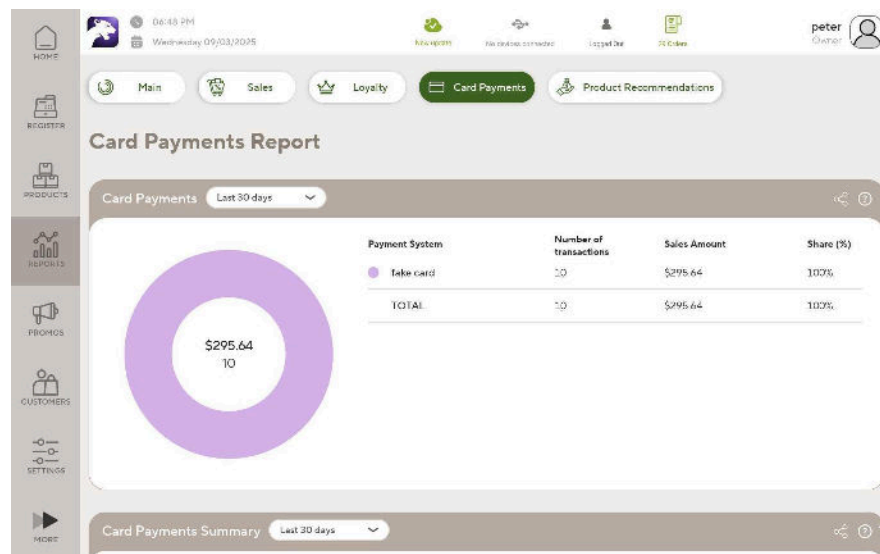

The following new features have been added to Panther POS in the current release.

Card Payments Reports

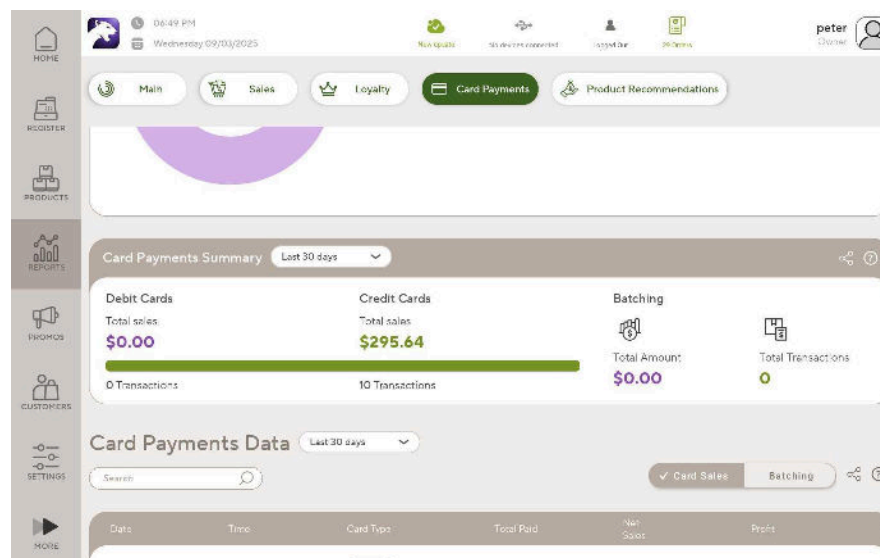

In reports system - tapping on the Card Payments Button will open the new screen

Key Features:

- **Infographics for Quick Insights:**
 - **Card Payments Pie Chart:** Visual breakdown of sales by card payment type (Debit/Credit).

- **Card Payment Summary:** Summarizes total sales, number of sales, and total amounts for Debit and Credit card payments across all terminals.

- **Batching Summary:** Provides a quick view of the number of transactions and total amount batched.

- Each infographic includes a time frame picker (today, last 7 days, last 30 days) and a share option.
- **Detailed Data Tables:**
 - **Card Sales Table:** View all card sales transactions, including date, time, card type, total paid, net sales, and profit.

Date	Time	Card Type	Total Paid	Net Sales	Profit
08/29/2025	16:17:26	2	\$23.34	N/A	N/A
08/27/2025	16:02:00	Credit	\$17.50	N/A	N/A
08/27/2025	16:00:54	Credit	\$36.40	\$35.00	\$29.73
08/22/2025	16:41:47	Credit	\$36.40	\$35.00	\$29.73
08/19/2025	15:58:55	Credit	\$36.40	\$35.00	\$29.73
08/18/2025	16:04:07	Credit	\$36.40	\$35.00	\$29.73
08/16/2025	11:22:28	Credit	\$36.40	\$35.00	\$29.73
08/06/2025	16:18:42	Credit	\$36.40	\$35.00	\$29.73

- **Batching Table:** Access all batched out transactions from the terminal.
- Seamlessly switch between "Card Sales" and "Batching" views using a selector.
- Includes search functionality, export data options, and a time frame picker (today, last 7 days, last 30 days).
- Tapping on a line in the "Card Sales" table will open the respective transaction view for detailed information.
- **No Data Handling:** The system will display a clear message when no data is available for the selected time frame or filters.

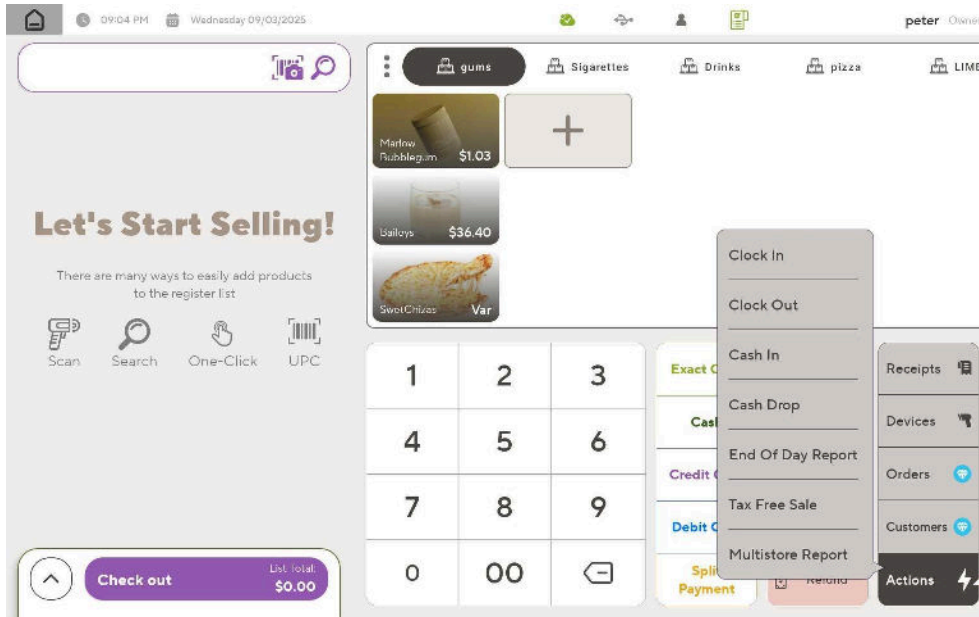

This feature requires a Premium license with Advanced Data.

Tax Free sale

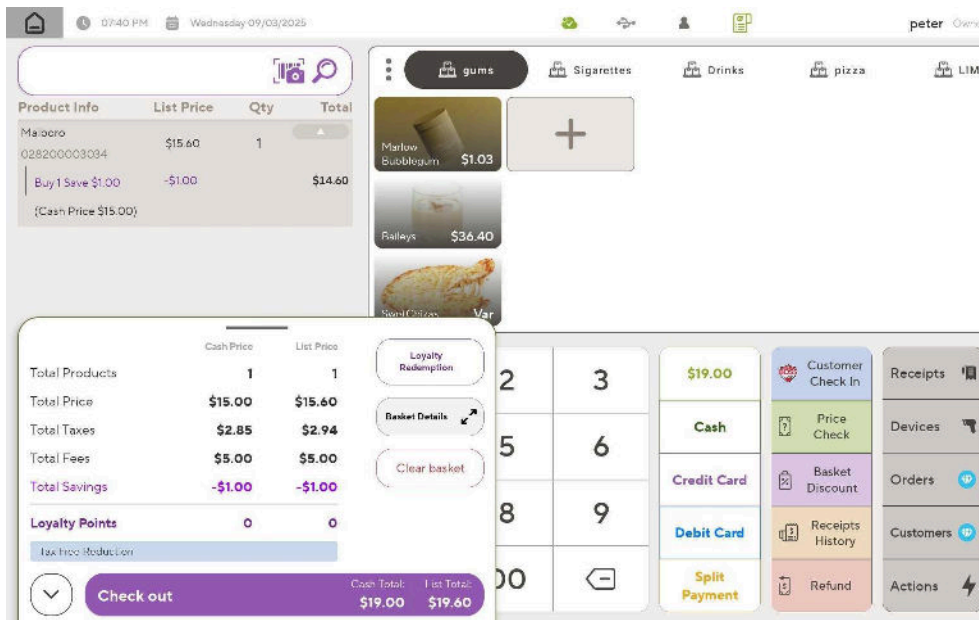

This release introduces a new "Tax Free Sale" mode, allowing merchants to process transactions without charging taxes.

Key Features:

- **On-Demand Activation:** Tap the "Tax Free Sale" button in the quick actions menu to initiate the mode for the current basket.

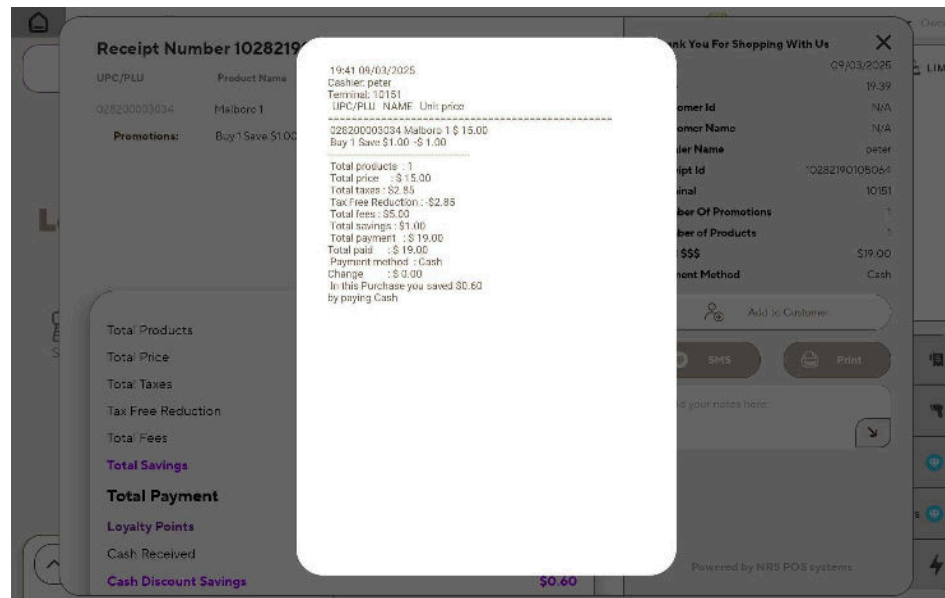

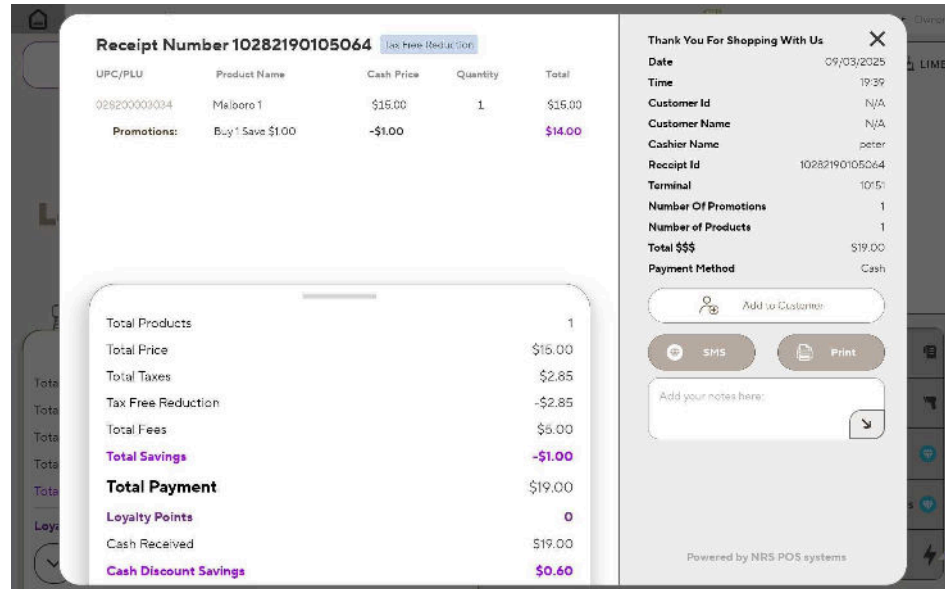

- **Clear UI Indication:** A "Tax Free Reduction" indicator will be visible on the display line when the mode is active

- **Session-Based:** The tax-free mode applies only to the current basket and automatically ends upon clearing the basket or completing the payment. It needs to be re-activated for each new tax-free transaction.
- **Tax Calculation (Not Charged):** While in this mode, all taxes are calculated but are not charged to the customer.

- **Checkout Visibility:** During checkout, all taxes will be clearly shown as "free."
- **Receipts and Transactions:**
 - Printed and viewed receipts will show the original tax amount.
 - A new line "Tax Free Reduction" will display a negative amount equal to the original taxes.

- **End of Day Report (EODR):**
 - No addition to the standard taxes line.
 - A new line in the "Other Information" section, "Tax Free Reduction," will include the number of transactions and the total amount.
- **Cancellation:** Tap the "Tax Free Sale" button again in the actions menu to cancel the mode.

System Support:

- Requires appropriate permissions to activate.

Product Package options

Product Package Register Handling

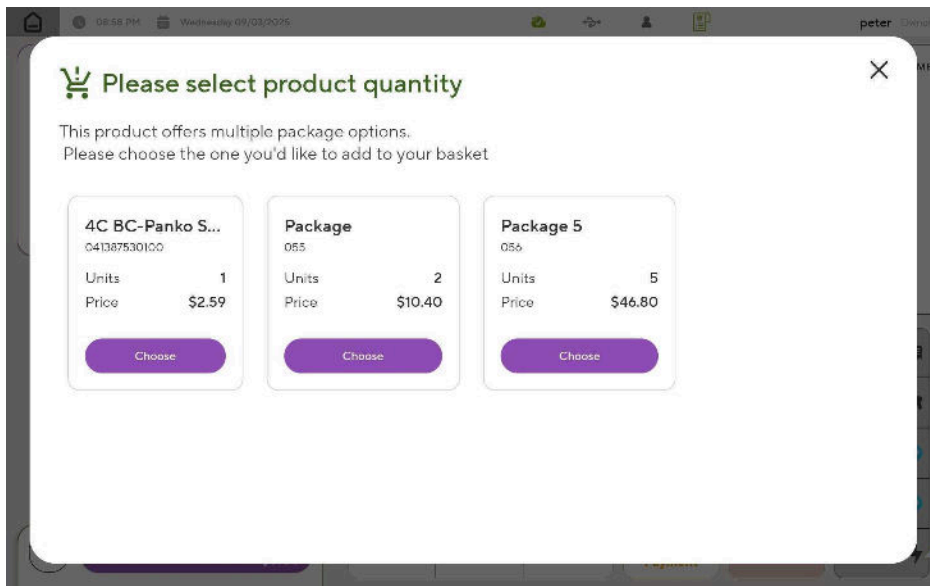

This release introduces enhanced functionality for managing products with multiple package options directly within the register, streamlining the sales process for items sold in various configurations.

Key Features:

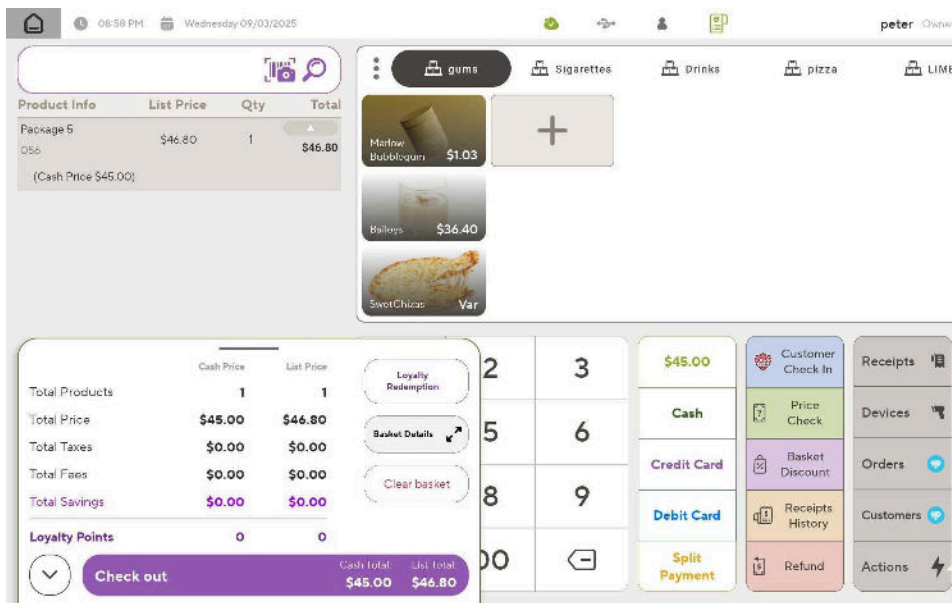

Intuitive Package Selection: When a product with defined package options is added to the basket, a clear and user-friendly "Please Select Product Package" popup will now appear.

Comprehensive Package Information: The selection popup displays essential details for each package, including its name, UPC, number of units, and price, enabling cashiers to make informed selections quickly.

Seamless Basket Integration: Once a package is selected, it is accurately added to the basket.

Grouping Logic Support: The system intelligently applies any pre-configured product grouping logic after package selection, ensuring that the correct parent product or grouped item appears in the basket (e.g., selecting a "Beer (Single Can)" package will correctly categorize it under "Bottled Beer" if grouped).

Multiplier Compatibility: If a quantity multiplier is applied before package selection, the chosen package will correctly reflect this multiplier in the basket.

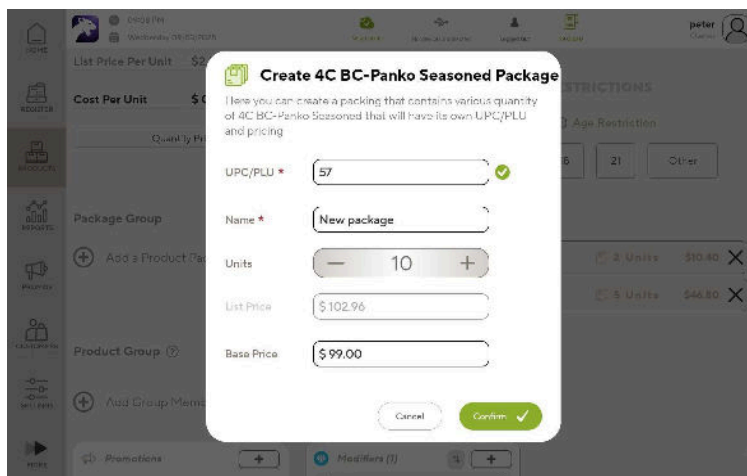

Flexible Workflow: A "Close" button on the package selection popup allows cashiers to easily dismiss the popup without adding any product, providing flexibility in managing transactions.

Product Package Enhancements

We've introduced significant improvements now you can create and manage product packages, allowing for multiple packages of the same product being linked

- **New Product Package Creation:**

- Easily create new variations of existing products with custom quantities.
- Each package can have its own unique UPC/PLU, name, stock, and pricing.
- The "Units" field represents the number of original products contained within the new package (must be greater than 1, default is 2).

- **Pricing Modes:**

- **Manual:** Set a specific price for the package independently.
