

NRS Petro

Release Update - 4.0

April 2026

Quick-Pay

Fuel can now be added to the basket from the register. Instead of using the Add Fuel button to transition to the Pump Panel to add fuel and authorize, **Inside Gas Sales** can be added as a basket item.

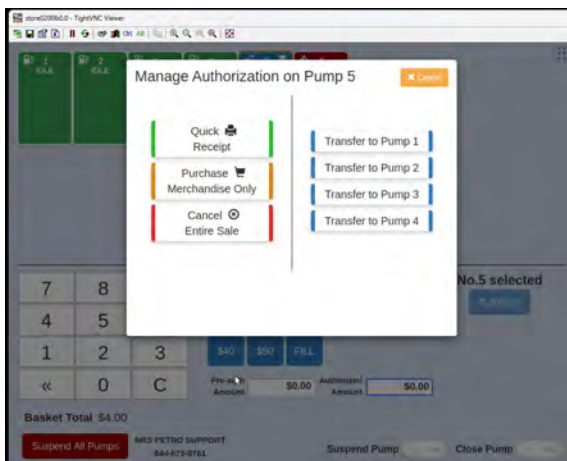

Release Notes for Fuel Quick-Pay:

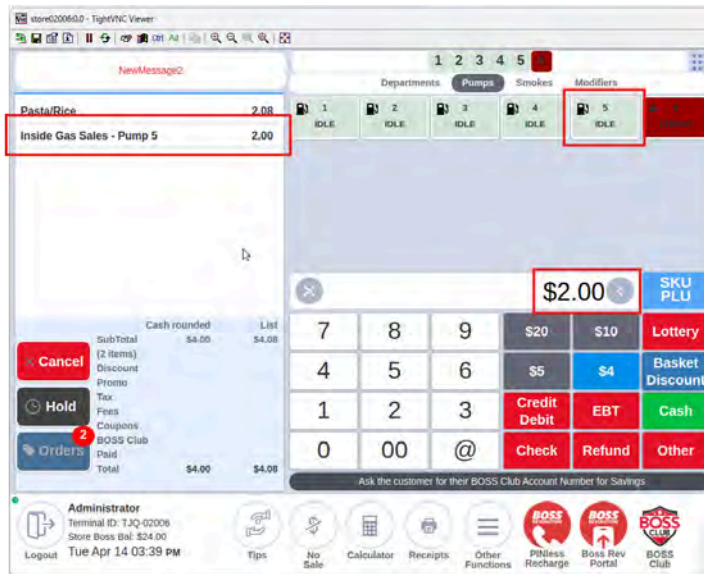

- The **Add Fuel** button has been removed making room to display the **Receipts** button. Fuel now goes into the basket up front from the register along with any merchandise.

- Stand alone fuel authorizations can still be made from the pump panel in addition to Quick-Pay.
- **Transfer, Cancel, Quick Receipt** and **Purchase Merchandise Only** functions for fuel authorizations are still administered from the pump panel.

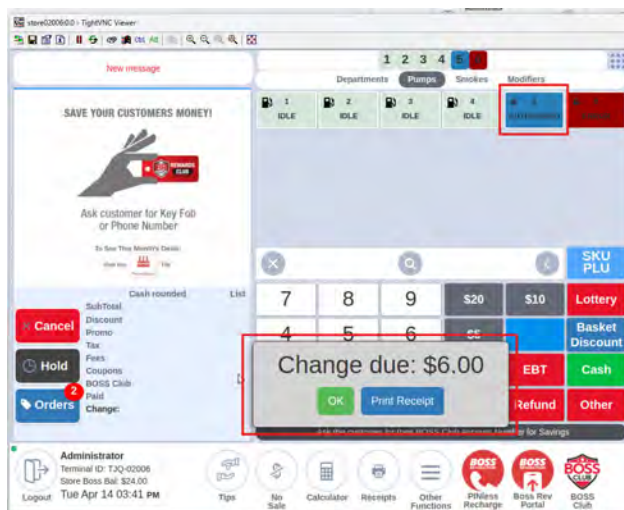

- Enter an amount and then select a dispenser. An **Inside Gas Sales** basket item will be added to the basket indicating the dispenser and authorization amount.

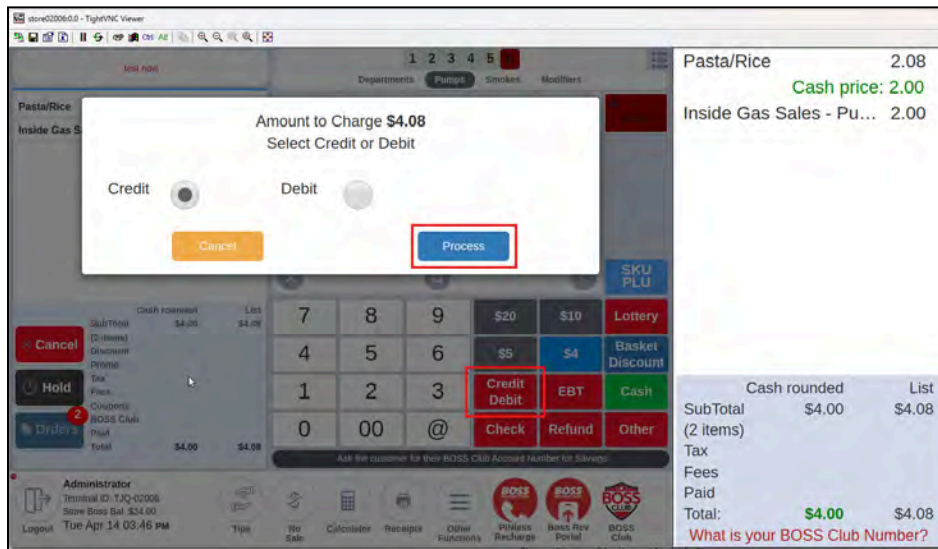

The pumps are prominently displayed under the Pumps nav-pill on the categories menu.

- Add merchandise as with any other basket either before or after adding fuel. All basket functionality is supported (item modifiers, BOSS Rev, discounts, loyalty etc.). Quick-Pay can not be combined with Online Orders.
- For cash payments where change needs to be dispensed the Change Due dialog will appear with the amount of change. If change is due, the cash drawer will open. Click **Print Receipt** to print the **Quick Receipt**. SMS receipts are only available once the fueling has completed and the basket is closed.

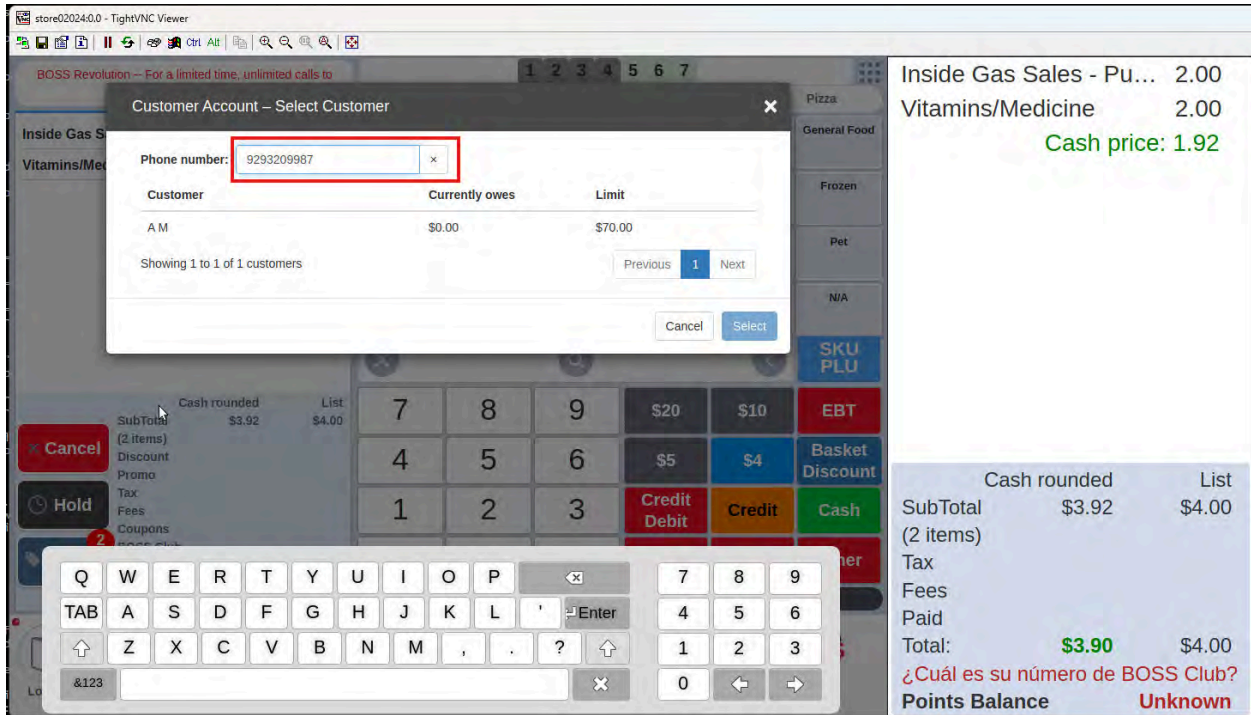

- Credit payments will invoke the Credit/Debit dialog to perform a credit pre-auth.

- The basket will disappear until fueling is completed.
- When fueling completes, change will be given for cash payments in case the full amount was not fueled. Credit payments will finalize and charge the card accordingly.
- **Multiple payment types are accepted with the following behavior:**
 - If a credit card is used, it will be dedicated to the fuel first and must be sufficient to cover the authorization amount.
 - The credit price will be charged for the fuel (and for Cash Discount items).
 - The balance can be any payment type.
 - Multiple cards can be used but the fuel will be charged against the first card tendered and will be pre-authorized.
 - Subsequent cards will be done as a straight charge.
 - Debit can not be used for the fuel portion of Quick-Pay basket or an UNSUPPORTED TRANS error will appear. Pay for the fuel portion with Credit and the balance with Debit.
 - Cancelling will void any pre-auth or charge on all cards and the cash returned.
 - Fueling less than the authorized amount will be settled against the card (not in cash)
- Customer Tab is accepted. No entry is logged against the Customer Tab account until fueling completes and the basket closes. To initiate, click the Customer Account button as usual.

Instead of opening the portal, the Customer Account dialog will display and the customer will appear when their phone number is entered. Select the user to close the sale or Cancel to return to the basket.

- Other payment types (NationsBenefits, EBT and WIC) are restricted as per their specific purchasing guidelines.
- Manual Discount can be applied to a basket and will be distributed evenly to all the items in the basket including **Inside Gas Sales**.
- Cash Discount does not apply to **Inside Gas Sales** items.
- Rounding applies to Quick-Pay purchases and is applied to both the initial and final payments.
- Debit is not an acceptable form of payment for the fuel portion of Quick-Pay baskets. An UNSUPPORTED TRANS error will appear on the credit dialog.
- For Cash, Auto-Close will fire off if the full amount is fueled. If not, the transaction must be closed out manually. Auto-Close will fire for credit in all cases.
- If the wrong dispenser is selected and put into the basket, the item should be removed and a new dispenser should be authorized. Alternatively, the basket can be tendered and authorized and transferred to the correct pump via the Basket Transfer dialog on the pump panel.
- Prior to payment it's possible to hold and transfer a basket to a different POS.
- Should the pump go into CALLING state prior to payment because someone outside picked up the hose, the sale will not go through. A message will appear. The options are to put the basket on hold until the dispenser becomes available, remove the fuel authorization and authorize a different dispenser or cancel the sale entirely.
