Adding a credit card to account

What's New

Retailers can now add a credit card to their newly created BOSS Revolution account and complete their first account recharge using a secure mobile flow.

How It Works

1. The retailer goes back into the **BOSS Revolution POS Widget**.
2. The retailer clicks the **Add Funds** button at the top of the screen.
3. The POS will display a **QR code** that the retailer can scan with their mobile phone. Or the retailer can get a one-time link via text message sent to their mobile phone to access the secure funding page.
4. After scanning the QR code or opening the link, the retailer will receive a **verification code** via SMS sent to the mobile phone number tied to the account.
5. The retailer enters the verification code and clicks **Login**.
6. The retailer clicks **Add Funds**.
7. The retailer enters their **credit card information** on and clicks **Continue**.
8. The retailer will then be asked to enter the required **billing address information**.
9. Once completed, the credit card will be saved to the retailer's BOSS Revolution account.
10. The retailer can then select the recharge amount:
\$50, \$100, \$200, \$300 or a Custom amount
12. After selecting the amount, the retailer clicks **Pay**.
13. The retailer will be asked if they want to Continue with Auto Recharge
14. Once completed, the account will be funded and ready to use.
