Auto-Recharge Setup for BOSS Revolution Account Funding

Retailers will have the option to set up **Auto-Recharge** when adding funds to their BOSS Revolution account.

How It Works

1. After adding a credit card, the retailer can choose whether to set up **Auto-Recharge**.
2. If the retailer does not set up Auto-Recharge during the initial funding process, they will be prompted again the next time they click **Add Funds** in the POS widget.
3. To enable Auto-Recharge, the retailer clicks the **Auto Recharge** button.
4. The retailer can select:
 - The recharge amount
 - The balance amount that will trigger the recharge
5. For example, the retailer can set the account to automatically recharge **\$100** whenever the balance drops below **\$50**.
6. Once saved, Auto-Recharge will be enabled on the retailer's account.
7. If the retailer did not initially setup Auto recharge and later want to enable Auto Recharge they will need to click on **Edit Credit Card Information**.
8. From there, the retailer selects **Edit Auto Recharge Settings**.
9. The retailer chooses the amount they want to automatically recharge.
10. The retailer selects the balance amount that should trigger the auto-recharge.
11. The retailer clicks **Save**.
12. Once saved, the updated Auto-Recharge settings will be applied to the account
