

Cash Discount Report FAQs

1. What is the Cash Discount Report?

The Cash Discount report provides a precise financial breakdown under Terminal Statistics, revealing how your Cash Discounting/Global Price Increase (GPI) rules apply to card processing cycles and affect your final estimated bank deposits.

2. Why is my Cash Discount Report summary page completely blank?

The layout calculates metrics directly from credit card settlement sequences. If your store has not performed a scheduled automatic terminal batch-out within the selected date criteria, the reporting cards will show no values.
