Release Update Notes

Loyalty Customer Directory

The **Loyalty Customer Directory** in the **Merchant Portal** allows stores to view and manage their loyalty customers clearly and independently. They can view loyalty points and clubs, and transfer them between phone numbers.

Uber Eats Integration

We're excited to announce that **Uber Eats** is now available as a third-party integration in **Order Management** - joining DoorDash and Grubhub as part of our growing delivery platform ecosystem. The **POS** can now be linked to Uber Eats, and all incoming orders can be managed directly from the **Order Management System**.

Cash Discount Report

Displays a new report for cash discount available on the **POS** reports, providing a clear breakdown of how cash discount (GPI) impacts the estimated store deposit.

Unified Printing for Kiosk

Kiosk customers can now route their items to different kitchen printers, use expo printing and delay automated printing until payment is received.

Publish Store Updates

A new **Publish Store Updates** button is now available in **Order Management**, allowing merchants to easily update and synchronize their store information to DoorDash, Grubhub, Uber Eats, and your **Ecommerce** storefront and **BOSS Local** app store.

New Order Push Notifications

Real-time push notifications will now appear on the **My NRS Store** app whenever a new order is placed - regardless of the source: **Ecommerce** website, **BOSS Local** app, Kiosk, DoorDash, Grubhub, or Uber Eats.

Start Date Limited in Store Statistics

The **Store Statistics** in the **Merchant Portal** and **My NRS Store** app will now only allow presenting the earliest date as the January 1st that occurred **3 years** prior to the current date.

Balance Due Amount Added to Printed Receipts

Receipts printed on the POS now have an extra line after the **Total Sales** which shows the **Balance Due** by the customer after promos and discounts have been applied.

Customer Account Now Accepts Split Payment

When a cashier wants to apply a partial payment using the **Customer Account**, the **Customer Account** payment can only be made after other payment types are processed.
