

Nightshade

August 2026

Release Notes

Multiple Printer Support

Introducing **Unified Kitchen Printing**, which greatly enhances **NRS's** kitchen printing capabilities. It offers:

- Printer Routing: Routes products to specific printers.
- Expo Printing: All food products, even those not sent to the kitchen, will print to the **Expo Printer** (usually located at the counter).
- Automated printing based on payment status.

Customer Directory - Edit Loyalty Balance (Clubs & Points)

Merchants can now manually adjust customer loyalty balances directly from the **Merchant Portal**- for both **Clubs (punches)** and **Points** programs.

Printing Only Cash Prices on Receipts for Transactions Paid in Cash

By default, both **Cash** and **List** prices are printed on **Register** receipts when **Cash Discount** is enabled for transactions paid in cash. There is **now** an option to show **only Cash** prices for these transactions by turning off the new **Include list price on cash receipts** toggle.

Profit and Margin Displayed on Pricebook Details

The profit margin is now visible when adding/editing **Pricebook** items so that prices can be adjusted accordingly.

Price Below Cost Warning

A **Pricebook** warning will now appear when setting the item's price below its cost, alerting merchants that they will not earn a profit when selling the item at the current price.

Total Profit Added to Total Report

The Total Profit for a selected date range has been added to the **Profit Report** in **Advanced Data**.

Multi-Select Option for Bulk Cost Update

Multi-Select can now be used in the **Pricebook** on the **POS** and **Merchant Portal** to update the cost of inventory in bulk, eliminating the need to change items with an identical cost individually.

Multi-Select Option for Bulk Delete

The **Multi-Select Pricebook** option in the **POS** and **Merchant Portal** now also allows deleting multiple items at once.

Profit and Margin Displayed on Pricebook Details

The dollar profit and margin percentage are now visible when adding/editing **Pricebook** items so that prices can be adjusted accordingly.

Hold Basket Permissions Added

Store owners can now set permissions to prevent employees from being able to hold baskets.
