Panther .61 Release

General FAQs

1. **Why does the Print to Kitchen ticket have more space?**
   Approximately 0.5 inches of blank margin space (about three lines) has been added to the top of all Print to Kitchen slips so tickets fit securely into metal kitchen ticket rails without obscuring the top order items.

2. **Where do I find my transaction history in the redesigned Reports screen?**
   The full transactions table has been relocated into its own dedicated Transactions tab appearing beside the Menu tab (where past sales can be searched by date). Note that the Costs Warning column has been removed from this table.
