Panther .61 Release

Spanish FAQs

General Information

1. **How does Spanish Language Support work across terminals?**
   Store owners cannot update language settings across terminals. Language updates are terminal specific.

2. **Will switching the language to Spanish require a system reboot?**
   Yes. Switching the language selection triggers an automatic application restart on the POS to reload all screens into Spanish.

Troubleshooting for Support

3. **Why did my POS terminal suddenly restart after I flipped the language toggle?**
   The application must perform a quick restart to clear the cache and reload all visual text, buttons, and system options into Spanish.
